What does it mean to be green? "Green" is not just a color. It also means saving the environment(環境) — the water, the land(土地), and the air. Why green? Trees are green, and without(沒有) them the Earth can't be a lovely(可愛的) home for us.

Every day, people create(創造) a lot of trash and pollution(污染) in our world. What can you do? A whole lot. Here's a four-step(步驟) guide for us to be green:

1.Reduce(減少) it!

When you use less(較少) of something, you do a good thing for the Earth. Turn off lights when you're not using. Turn off the water when you're brushing your teeth(牙齒). When you can, walk or ride(騎) your bike instead of(取代) riding in(駕駛) a car. You'll use less gas — and get some exercise(運動)!

2.Reuse(重複使用) it!

We throw away old stuff and buy too much new stuff. Many times, you don't need something, but someone else does. We can give it to them. Choose reusable cups instead of paper or plastic cups. Take reusable bags when you go shopping.

3.Recycle(回收) it!

By separating(分離) plastic(塑膠) bottles, cans, bottles, and more, you're reducing the amount(量) of trash. We can make new bottles, cans, cups, paper, and even clothes with recycled(回收的) material(物質).

4.Enjoy it!

Although trash and pollution are problems, but there are still a lot of places for us to visit. You can start your trip in your city and state. Go hiking(健行), climb(爬) mountains, visit our national(國家的) parks, and taste the outdoors(戶外) in all kinds(種類) of weather — from a sunny day at the beach(海灘) or lake to a snowy adventure(冒險).

To be green is very important. If(如果) we do all these things every day, the earth can be healthy and lovely.

26. What is the main idea of this reading?
